DETAILED ACTION

Election/Restrictions

1. The applicant has elected claims 1-22. Claims 23-28 have been cancelled.

Claim Rejections - 35 USC § 112

2. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the claim is incomplete because it recites a plurality of the steps such as (a) sampling; (b) detecting as packet; determining an initial boundary position ... in order to determine the final boundary position (step e) based on the results of the comparison (from comparison step (f)). There is no step cited in the claim 1 from step (a) to step (d) used to determine the final boundary position.

Claims 2-22 are rejected by virtue of their dependency.

Allowable Subject Matter

3. Claims 2-22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of the record discloses step of the determining the initial boundary position step comprising: correlating a most recent sample with each sample from a plurality of previous samples, computing

an average correlation from the correlation results; computing a threshold from an averaging of a sequence of previously calculated average correlations; comparing the average correlation with the threshold; and determining the initial boundary based on the results of the comparison.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hadziomerovi (U.S. Pat. 4,531,212) discloses a demultiplexer.

Osawa et al (U.S. Pat. 5,848,067) disclose an Aal1 processing method and apparatus.

Ozluturk (U.S. RES. 38,523) discloses method for generating code sequences.
